

CONSENT-BOTOX, DYSPORT, XEOMIN, & JEUVEAU

Consent:

Consent for Botox, Dysport & Xeomin INFORMED CONSENT INTRODUCTION

Thank you for choosing Advanced Dermatology for your cosmetic skincare treatments. We value the opportunity to consult you on your aesthetic concerns and desires in the effort to promote healthy youthful skin.

Cosmetic treatments (injectable and laser, light or other energy-based therapy) are procedures that have both benefits and risks that need to be considered. A series of documents called Informed Consents have been prepared for you by Advanced Dermatology, LLC to help you make an informed decision. Informed Consent documents are used to communicate information about treatments, along with disclosure of risk and alternative treatment(s). It is important that you read these documents carefully and completely.

Only when you have no questions or concerns do you initial each page, indicating that you have read and fully understand all the items it discusses. When you arrive at the end of the document, please sign the consent for the procedure. If you have any remaining questions or concerns, do not sign the consent until getting these questions answered by Dr. Taub, one of her staff members or Advanced Dermatology's Cosmetic Coordinator at 847-459-6400.

FINANCIAL RESPONSIBILITY: All cosmetic, injectable and laser, light or other energy-based treatments are considered a cosmetic procedure and therefore not covered by insurance. We will not submit these treatments to your insurance and require that you pay at the time of service. You will receive Financial Protocols for each treatment that is recommended for you that are valid for 90 days from the date of our recommendation. Should the price change after 90 days you would be responsible for any increase in cost.

WHO WILL PERFORM MY TREATMENTS: We have a variety of highly skilled providers for each of our services: Amy Taub, MD, Anne Marie Leger, MD, Monika Kaniszewska, MD, Emily Oehler, PA-C, Steven Prus, PA-C, Ann Cameron Schieber, PA-C, Jessica Dooley, PA-C, Elana Block MSN, RN, Alla Molchanov, Lic. Cosm., Emily Jamieson, Lic. Esth. (LE), Rachel Walker, LE, Nicole McNellis, LE, Alyssa Conner, LE, and Brittany Hartnett, Lisc. Cosm. All providers at Advanced Dermatology have been specifically trained by Dr. Taub and are all licensed professionals in the state of Illinois. Dr. Taub reviews and approves every treatment performed at Advanced Dermatology. Dr. Taub is a board-certified dermatologist with over 20 years in practice and is Medical Director and Founder of Advanced Dermatology. We have taken great measures to ensure that your treatment is performed safely and effectively. We attend national meetings frequently to keep updated on the latest, best and safest techniques and remain at the forefront of cosmetic dermatology.

DISCLAIMER: What your Physician, Physician Assistant, Laser Provider, Esthetician, Cosmetologist, and/or Cosmetic Coordinator have discussed with you and included again in these documents are the material risks, both common and uncommon, that they feel a reasonable person would want to know, understand, and consider in deciding if this treatment is something they would like to proceed with. Some risks cannot be foreseen. It is important that you read the information contained in each consent document and have all your questions answered before signing the consent. Questions and concerns can be answered in the office through a consultation appointment or by calling 847-459-6400.

BOTOX® Cosmetic, Dysport™, Xeomin®, & Jeuveau™: INFORMED CONSENT

INTRODUCTION: BOTOX® Cosmetic, Dysport™, Xeomin®, and Jeuveau™ injections are non-surgical procedures designed to relax the facial muscles that cause wrinkles in the brow, forehead, bunny lines, around the eyes, lips, neck, and frown lines (DAO) resulting in a more serene-looking face. BOTOX® Cosmetic has been used safely for many years in the treatment of muscle disorders of the eyes and voicebox, headaches, and spasticity of the stomach. BOTOX® Cosmetic, Dysport™, Xeomin®, and Jeuveau™ have been FDA approved to treat glabellar frown lines.

ALTERNATIVE TREATMENT: Alternative forms of treatment for dynamic wrinkles include topical creams, injectable fillers, Matrix IR, eMatrix and other laser procedures.

WHO IS A GOOD CANDIDATE: People with wrinkles in their brow, forehead, bunny lines, around the eyes, lips, neck, and frown lines (DAO) caused by muscle movement are good candidates for this treatment.

WHO IS NOT A GOOD CANDIDATE: Patients with the presence of infection at the proposed injection site(s), neuromuscular junctional disorders (such as myasthenia graves or Lambert-Eaton syndrome), or who are pregnant should not have BOTOX® Cosmetic, Dysport™, Xeomin® or Jeuveau™ treatments. **NEUROLOGICAL CONDITIONS:** It is not recommended that anyone with a significant neurological disease, such as myasthenia gravis, or anyone who has experienced at any time temporary or permanent

paralysis, loss of vision or double vision have this procedure. It is believed that persons with such conditions may be at increased risks for complications from these treatments or worsening of an underlying neurological disorder.

RISKS: Although the majority of patients do not experience these complications, it is important that you understand the risks involved in BOTOX[®] Cosmetic, Dysport[™], Xeomin[®], and Jeuveau[™].

DISCOMFORT: There is a degree of discomfort from the small-gauge needle that is inserted under the skin. There may be a slight burning discomfort as the BOTOX[®] Cosmetic, Dysport[™], Xeomin[®], and Jeuveau[™] is injected into the muscle.

BRUISING AND SWELLING: Most patients have some swelling in the injection area for 30 minutes to a couple of hours. Bruising may occasionally occur and may take 7-10 days to clear.

INFECTION: Like any injection technique, an infection may rarely occur and can usually be treated with topical or oral antibiotics. Severe infections are rare but may require drainage or surgery.

ASYMMETRY: There is usually some asymmetry in each person's face. If the BOTOX[®] Cosmetic, Dysport[™], Xeomin[®], and Jeuveau[™] accentuates this, it can usually, but not always, be corrected with a small amount of subsequent product.

FUNCTIONAL PROBLEMS: BOTOX[®] Cosmetic, Dysport[™], Xeomin[®], and Jeuveau[™] may migrate into nearby tissues, and may cause functional or esthetically displeasing effects such as brow ptosis (drooping of the brow), eyelid ptosis (drooping of an eyelid), diplopia (double vision), lagophthalmus (weakness of eye closure), dysphonia, dysphagia (abnormal swallowing), or lip drooping. Fortunately, these side-effects are extremely uncommon and temporary (as the product effect wears off in a few months).

HEADACHES: Occasionally BOTOX[®] Cosmetic, Dysport[™], Xeomin[®], and Jeuveau[™] can cause headaches, although it is often used for the treatment of migraine headaches. These are usually transient and occur because other muscles are contracting trying to make up for the ones that have been relaxed. There have been rare reports of severe headaches lasting after BOTOX[®] Cosmetic, Dysport[™], Xeomin[®], and Jeuveau[™] injections.

DRY EYES: BOTOX[®] Cosmetic, Dysport[™], Xeomin[®], and Jeuveau[™] injections can exacerbate dry eyes when it is injected under the pupil on the lower eyelid.

GENERAL BODY SYMPTOMS: These occur very rarely (less than 0.1%) but can include skin rash, itchiness, general malaise, headaches, drowsiness, fever or flu-like symptoms that last for several hours or several days to weeks. These symptoms are temporary and may be treated with acetaminophen or ibuprofen. Please contact Advanced Dermatology immediately if any of these symptoms occur.

RESULTS: The duration of improvement with the BOTOX[®] Cosmetic, Dysport[™], Xeomin[®], and Jeuveau[™] treatments varies between patients. Generally, results of treatments for wrinkles take full effect in 1-2 weeks and last 3-4 months but may wear off sooner. Repeat treatments can be performed and some patients note longer results with subsequent treatments at regular intervals. Repeat treatments that are performed too soon can lead to the treatment losing its effectiveness.

PATIENT SATISFACTION: BOTOX[®] Cosmetic, Dysport[™], Xeomin[®], and Jeuveau[™] are best at treating dynamic facial lines, those caused by facial muscle activity; lines present at rest may or may not improve. A treatment may not work as well or for long as expected, may be effective for variable lengths of time with subsequent treatments, or may not work at all. Although most of our patients/clients are extremely satisfied with their results, results are variable. We cannot provide you with any guarantee of your results.

POST TREATMENT CARE: Follow the instructions given to you by your provider and on the post-op info sheet. Failure to do so may result in sub-optimal results or side effects such as listed above.

PATIENT MEDICATION GUIDE: A copy of the Patient Medication Guide will be given to each patient at the time of treatment. The copy of the Guide has not been altered by Advanced Dermatology, LLC.

Do not touch the equipment while in the room. Laser equipment is dangerous and a misfire could cause skin or eye damage that is permanent.

CONSENT FOR PROCEDURE

I have read all pages contained in this document and hereby authorize the following provider(s): Amy Taub, MD, Anne Marie Leger, MD, Monika Kaniszevska, MD, Emily Oehler, PA-C, Steven Prus, PA-C, Ann Cameron Schieber, PA-C, Jessica Dooley, PA-C, and Elana Block MSN, RN to perform the following procedure: **BOTOX[®] COSMETIC / DYSPORT[™] / Xeomin[®] / Jeuveau[™]**

I recognize that during the course of the procedure unforeseen conditions may necessitate different procedures than those described above. I therefore authorize the provider(s) to perform such other procedures that are in the exercise of his or her professional judgment necessary and desirable.

I acknowledge that no guarantee has been given by anyone as to the results that may be obtained.

I consent to photographic use for medical, scientific, and/or educational purposes for the appropriate portions of the face and/or body.

For purposes of advancing medical education, I consent to the admittance of observers to the procedure.

IT HAS BEEN EXPLAINED TO ME IN A WAY THAT I UNDERSTAND:
THE ABOVE PROCEDURE TO BE UNDERTAKEN
THERE MAY BE ALTERNATIVE PROCEDURES OR METHODS OF TREATMENT
THERE ARE RISKS TO THE PROCEDURE PROPOSED
ANY QUESTIONS I MAY HAVE ASKED HAVE BEEN ANSWERED TO MY SATISFACTION

I consent to the procedure and the above listed items. I am satisfied with the explanation.

My Physician discussed my procedure, I understand the risks and benefits of the procedure have read the consent form
I understand and I received a copy. I agree.
